## Employment

### Website Production Support

Toronto District School Board, Toronto, ON

May – August 2016

- Developed a public-facing financial report database in ASP.NET and C# that allows end users to manage hundreds of documents.
- Conducted UX analysis on external site UI, reporting critical issues, comparing against site UI/UX of several competitors, and providing solutions based on extrapolated results.
- Automated spreadsheet data cross-referencing and CSS file generation with Excel VBA macros, reducing time taken by 50% and allowing for 150+ generated themes.
- Responded promptly to technical support requests, assisting end users with website management and maintenance.

### Web Design Course Instructor

The Olympiads School, Toronto, ON

July – August 2016

- Taught web development classes to 15 students of little to no prior programming experience.
- Established design principles and HTML/CSS fundamentals, extending both concepts to real-life applications through creating individual websites.

### Freelance Web Developer

Toronto, ON

October 2014 – Present

- Created client-commissioned websites using HTML, CSS, and jQuery.
- Worked extensively with customers during user research, planning, and implementation phases.

## Projects

### Symphony Themes | [symphonythemes.tumblr.com](https://symphonythemes.tumblr.com)

December 2015 – Present

- Created an open-source repository of unique Tumblr blog themes for public use.
- Generated 3000 views within a month, with designs gathering 1000+ downloads within a week of release.
- Built all designs with HTML, CSS, and jQuery.

### WatWhenWhere | [tiffanynwyeung.co/watwhenwhere](http://tiffanynwyeung.co/watwhenwhere)

December 2015

- Performed system testing as part of A/B testing phase.
- Reported multiple critical bugs directly to lead development team, including a significant login flaw that lead to major database restructuring.
